

# HP<sup>2</sup>RM SERIES™ Remote Driver - Solid State LED

## Installation Instructions

NEEDED FOR INSTALLATION:

- 1/8" Allen Wrench
- Waterproof Wire Connectors
- Level
- Phillips Screwdriver

By Others

### IMPORTANT SAFETY INFORMATION - READ, FOLLOW, AND SAVE THESE INSTALLATION INSTRUCTIONS

**IMPORTANT - WEAR GLOVES TO AVOID GETTING FINGERPRINTS ON THIS PRODUCT. MANY TEKA ILLUMINATION PRODUCTS ARE DESIGNED TO NATURALLY PATINA. OILS FROM YOUR SKIN WILL ACCELERATE THIS PROCESS WHERE TOUCHED AND ARE NEARLY IMPOSSIBLE TO REMOVE. THIS PROCESS OCCURS OVER TIME AND IS DETERMINED BY THE INSTALLATION ENVIRONMENT.**

#### INSTRUCTIONS PERTAINING TO A RISK OF FIRE, OR INJURY TO PERSONS IMPORTANT SAFETY INSTRUCTIONS

**Lighted fixture is HOT!**

**WARNING - To reduce the risk of FIRE OR INJURY TO PERSONS:**

Turn off/unplug and allow to cool before replacing LED. Fixture gets HOT quickly! Contact only switch/plug when turning on. Do not touch hot lens, guard, or enclosure. Keep fixture away from materials that may burn. Do not operate the luminaire fitting with a missing or damaged shield. Do not touch the source at any time. Use a soft cloth or gloves. Oil from skin may cause damage.

**SAVE THESE INSTRUCTIONS**

#### IMPORTANT SAFETY INFORMATION - READ, FOLLOW, AND SAVE ALL SAFETY AND INSTALLATION INSTRUCTIONS

- Product must be installed by a qualified person in a manner consistent with its intended use and in compliance with the National Electrical Code, Canadian Electrical Code, and all Local and Provincial Codes.
- Follow product label information and instructions.
- Qualified Personnel with appropriate personal protective equipment must perform all servicing of this product.
- Before wiring to power supply and during servicing, turn off and lock out power at fuse or circuit breaker before service.
- The use of accessory equipment not recommended by the manufacturer or installed contrary to instructions may cause an unsafe condition. The use of damaged components may cause an unsafe condition and void product warranty.
- Do not block light emanating from product in whole or part, as this may cause an unsafe condition.
- Never operate the fixture with missing or damaged lens. Lens must be cleaned on regular basis.
- Entire fixture may become extremely hot. Do not touch hot lens or fixture body.
- Replace LED assembly only with correct wattage and type of power supply appropriate for LED assembly.
- All gaskets, o-rings and sealing surfaces must be kept clean during installation and service; failure to do this may cause an unsafe condition and void product warranty.

#### IMPORTANT LISTINGS AND CERTIFICATIONS

- Suitable for wet locations

Please refer to the low voltage design guide at [www.tekaiillumination.com/lvguide](http://www.tekaiillumination.com/lvguide) before installation for proper wire selection.

#### Soil Prep

- A. Determine Soil Type by referencing DIG-IT Guide.
- B. Dig hole 18" wide and 20" deep.

- C. Prep soil according to DIG-IT Guide.

## Housing Installation

1. Connect branch conduit connectors (By Others) to the junction box using either the threaded conduit entries on the bottom of the junction box or through holes drilled into the sides of the junction box.
2. Place housing in hole. Align junction box in the path of the conduit trench.
3. Insert (4) pieces of 1/2" EMT conduit through the Stability Flange™. Hammer into substrate until secure.

**⚠ Leave sufficient clearance to elevate housing to finished grade.**

4. Raise housing on EMT so concrete pour collar is flush with finished grade. Use a level to aid in housing installation.
5. When housing is level, tighten screws on Stability Flange™ to secure housing to EMT. Remove excess EMT as needed.
6. Connect the conduit to the conduit connectors.

7. Per DIG-IT Guide, backfill the gap between the bottom of housing and bottom of hole with sand for drainage.
8. **For soil installation:** Fill and tamp soil to the appropriate height leaving room for sod, pavers, etc. to be level with the top of the temporary cover.
9. **For concrete installation:** Fill the hole around the fixture housing to 12" below the finished grade with clean fill dirt and tamp carefully to prevent settling of fixture. Pour concrete and finish as required flush with the top surface of the temporary cover.

**⚠ Soil installation is not drive-over rated.**

## Installation

1. Remove temporary cover.
2. Pull primary branch circuit wiring into junction box.

3. Make watertight connections using waterproof wire connectors (provided) to leads on the bottom of Patented HydroLock® Barrier Plate Assembly. See wiring diagram(s).

**WIRING DIAGRAM**

4. Wipe inside of housing where HydroLock® plate will sit clean of debris before inserting patented HydroLock® plate on to junction box. Align HydroLock® plate with pins in housing and seat it firmly in place.

5. Turn HydroLock® Barrier Plate clockwise ¼" to lock.

6. Connect driver assembly to Patented HydroLock® Barrier plate with quick disconnects.

**⚠ Patented HydroLock® Barrier Plate must be completely seated to ensure proper seal or water may intrude. This step must be done as stated or you will void your warranty.**

7. Lower driver assembly into HP2 housing.

8. Attach driver assembly to housing by aligning keyhole notch under one (1) of three (3) #8 screw heads.

9. Tighten the Phillips screws to secure driver plate to housing.

10. Remove any dirt or debris in O-ring groove near top of housing. Place O-Ring inside of groove.

**⚠ Failure to clean groove of debris will cause fixture to fail and void product warranty.**

11. Install faceplate using 1/8" Allen wrench and hand-tighten the faceplate screws in a star pattern to 30 in-lbs. min.

**⚠ Do not use a power tool to install screws. Do not exceed 40 in-lbs.**
